## Make half your grains whole grains

Any food made from wheat, rice, oats, cornmeal, barley, or another cereal grain is a grain product. Grains are divided into two subgroups, whole grains and refined grains. Whole grains contain the entire grain kernel—the bran, germ, and endosperm. People who eat whole grains as part of a healthy eating style have a reduced risk of some chronic diseases.

Make simple shifts

To make half your grains whole grains, choose 100% whole-wheat bread, bagels, pasta, or tortillas; brown rice; oatmeal; or grits.

Whole grains can be healthy snacks
Popcorn is a whole grain. Make it with
little or no added salt or butter. Also,
try 100% whole-wheat or rye crackers.

Save some time
Cook extra brown rice or oatmeal when you have time. Refrigerate half of what you cook to heat and serve later in the week.

Mix it up with whole grains
Use whole grains in mixed dishes, such as barley in vegetable soups or stews and bulgur wheat in casseroles or stir-fries.

Try a quinoa salad or pilaf.

Bake up some whole-grain goodness
Experiment by substituting buckwheat, millet, or oat
flour for up to half of the flour in your favorite pancake
or waffle recipes. To limit saturated fat and added sugars,
top with fruit instead of butter and syrup.

Be a good role model for children
Set a good example for children by
serving and eating whole grains every
day with meals or as snacks.

Check the label

Most refined grains are enriched. This means that certain B vitamins and iron are added back after processing. Check the ingredients list to make sure the word "enriched" is included in the grain name.

Know what to look for on the ingredients list
Read the ingredients list and choose products that name a whole-grain ingredient *first* on the list. Look for "whole wheat," "brown rice," "bulgur," "buckwheat," "oatmeal," "whole-grain cornmeal," "whole oats," or "whole rye."

Be a smart shopper
The color of a food is not an indication that it is a whole-

grain food. Foods labeled as "multi-grain," "stone-ground," "100% wheat," "cracked wheat," "seven-grain," or "bran" are usually not 100% whole-grain products, and may not contain **any** whole grain.
