10 tips Nutrition Education Series

# Vary your protein routine 

Protein foods include both animal (meat, poultry, seafood, and eggs) and plant (beans, peas, soy products, nuts, and seeds) sources. We all need protein-but most Americans eat enough, and some eat more than they need. How much is enough? Most people, ages 9 and older, should eat 5 to 7 ounces* of protein foods each day depending on overall calorie needs.

1Vary your protein food choices Eat a variety of foods from the Protein Foods Group each week. Experiment with beans or peas, nuts, soy, and seafood as main dishes.

2Choose seafood twice a week
Eat seafood in place of meat or poultry twice a week. Select a variety of seafood, including those that are higher in oils and low in mercury, such as salmon, trout, and herring.

3
Select lean meat and poultry
Choose lean cuts of meat like round or sirloin and ground beef that is at least $93 \%$ lean. Trim or drain fat from meat and remove poultry skin.

4Save with eggs Eggs can be an inexpensive protein option and part of a healthy eating style. Make eggs part of your weekly choices.

5

## Eat plant protein foods more often

Try beans and peas (kidney, pinto, black, or white beans; split peas; chickpeas; hummus), soy products (tofu, tempeh, veggie burgers), nuts, and seeds. They are lower in saturated fat and some are higher in fiber.

[^0]6

## Consider nuts and seeds

Choose unsalted nuts or seeds as a snack, on salads, or in main dishes. Nuts and seeds are a concentrated source of calories, so eat small portions to keep calories in check.

7Keep it tasty and healthy Try grilling, broiling, roasting, or baking-they don't add extra fat. Some lean meats need slow, moist cooking to be tender-try a slow cooker for them. Avoid breading meat or poultry, which adds calories.

8Make a healthy sandwich Choose turkey, roast beef, canned tuna or salmon, or peanut butter for sandwiches.Many deli meats, such as regular bologna or salami, are high in fat and sodium-make them occasional treats only.

9Think small when it comes to meat portions
Get the flavor you crave but in a smaller portion. Make or order a small turkey burger or a "petite" size steak.

10Check the sodium Check the Nutrition Facts label to limit sodium. Salt is added to many canned foods-including soups, vegetables, beans, and meats. Many processed meats-such as ham, sausage, and hot dogs-are high in sodium. Some fresh chicken, turkey, and pork are brined in a salt solution for flavor and tenderness.

[^0]:    * What counts as an ounce of protein foods? 1 ounce lean meat, poultry, or seafood; 1 egg; $1 / 4$ cup cooked beans or peas; $1 / 2$ ounce nuts or seeds; or 1 tablespoon peanut butter.
